Airtel launches 5G services

Jio, Voda Idea Coming Soon
 Pankaj.Doyal@timesgroup.com

New Delhi: Get set to enjoy 5G in India with Airtel kicking off the services in eight cities from today while Reliance Jio - the top industry player - promising to launch it from Diwali.
 Vodafone Idea, the third-largest mobile operator, is expected to join the bandwagon soon, with promoter Kumar Mangalam Birla saying that network upgrade is currently in the process of being in-

stalled. "... as an industry, we will ensure that we have the highest quality and the most affordable rates than anyone else in the world," Reliance Industries chairman Mukesh Ambani said after PM Narendra Modi inaugurated the services at the India Mobile Con- vices (organised by COAI and telecom industry).
 Ambani said that Jio will progressively pace up the launch and would cover the entire country by the end of next year. "I want to reiterate Jio's commitment to deliver 5G to every town, every taluka, and every tehsil of our country by December, 2023. Most of Jio's 5G is developed in India, and hence carries the stamp of Atmanirbhar Bharat."
 While the companies are yet to make their tariffs public, it is expected that in the initial days, the consumer bills will not be disrupted heavily. Industry analysts say that companies will go for easier customer upgrades in cities where they launch the services that promise consumer network speeds of over 100 Mbps while promising to revolutionise enterprise and other areas like education, healthcare and agriculture.
 Airtel said that it will debut the 5G services from eight cities that include Delhi, Mumbai, Bangalore, Chennai, Hyderabad and Varanasi. Company officials said that customers will have the option to migrate to 5G networks, though it is still not clear on how to make the transition and what the tariffs would be.
 Airtel chief Mittal said the company will roll out 5G services across several cities by March 2023, and through- out the country by March 2024. Vodafone Idea promoter Kumar Mangalam Birla also said that the company is in the process of upgrading its network "for a smooth and swift migration to 5G".

Pak govt's Twitter a/c withheld in India due to 'legal demand'

This account was withheld in July too but had been reactivated and was visible. According to Twitter guidelines, the microblogging site takes such action in response to a valid legal demand such as a court order

New Delhi: The Twitter account of the Pakistan government has been withheld in India. This is reportedly the second such incident in recent months.
 The account was withheld in July too but had been reactivated and was visible. Today, again the account displayed the message of being withheld in India. "@Govtof-Pakistan account has been withheld in India in response to a legal demand," is seen while accessing the Twitter handle.
 According to Twitter guidelines, the microblogging site takes such action in response to a valid legal demand such as a court order.
 Previously, the Union ministry of information & broadcasting had blocked 16 YouTube news channels including six Pakistan-based channels for spreading dis-information related to India's national security, foreign relations, and public order.
 Twitter said if it "receives a valid and properly scoped request from an authorised entity, it may be necessary to withhold access to certain content in a particular country from time to time."
 Such withholdings will be limited to the specific jurisdiction that has issued the valid legal demand or where the content has been found to violate local law(s)," the social media giant said.
 In June, Twitter in India banned official accounts of Pakistan embassies in UN, Turkey, Iran and Egypt.
